

### **REMARKS**

Support for the amendments to the main claim is to be found on p. 6, lines 5-7, p.7, lines 12-13 and 26-34 and p. 8, lines 26- 28 of the description and in the drawings.

Claim 1 has been restricted by the addition of features related to the sleeve and insert being made from flat stamped blanks. Flat stamped blanks are quite easy to mass produce. The restricted new Claim 1 also indicates that the lock tab can be provided by folding in a tab portion of the side wall and having it rest against the top wall in the folded together sleeve or by making stamping cuts in the blank at the corner crease between the side wall and the top wall and folding in the resulting portion to create the first stop tab, which then depends from both the top wall and the side wall (See Figs. 10 and 11). The sleeve and the insert with all of their essential parts can thus be made stamped from flat cardboard sheets, without the necessity of attaching, by gluing for example, further components or molding on such components to achieve the locking function, as is the case in the cited *Wisdom* document.

It is hoped that this restriction of the claim will remove the outstanding objections and now place the application in condition for allowance.

In the event there are any questions concerning this remark, or the application in general, the Examiner is respectfully urged to telephone the undersigned so that prosecution of the application may be expedited.

No additional fees beyond the extension and the RCE fee are believed to be due at this time however if necessary to effect a timely response the Commissioner is authorised to deduct the necessary fees from Deposit account No. 501249.

Respectfully submitted,

/Timothy Platt/
